

## Principal's Page

Planning for the future:

Maryborough Central State School has a clear futures orientation. The school plans to meet set goals and we measure our performance based on how we have performed against these goals and targets.

The first phase of the Triennial School Review (gathering data and feedback from parents, staff, students and community) has been completed. Phase Two will occur on 7th November when officers from the Wide Bay South District office will visit the school to be part of a verification process with representatives from the school and school community.
